CORNER STAGE

TECH RIDER

3530 Miskolc, Papszer utca 48., 1st floor, 2a
david@cornerstage.hu · +36 70 945 7909
cornerstage.hu/en/tech-rider

ARRIVAL	SOUNDCHECK	DOORS	
17:00	17:45	19:00	You can stop in front of the entrance while loading; after 8 pm you can also park there.

STAGE PLOT

■ Mains (ML, MR) ■ Monitors (MON 1–6) ▢ Power outlet (230 V) ▢ Fan ○ PAR (16 + 4 base lights)
◆ Beam (4) ■ Wash (2) ▭ Bar (2)

BRING

Cymbals and kick pedal.
Guitar and bass amps and your instruments.
We prefer digital pedals/modelers: if you can, don't carry your cabs and amps upstairs.
Extension cords and power strips if you need them.
Only the gear you need – we are on the first floor.

SEND IN ADVANCE

Send your input list and – if you have one – your stage plot at least 3 days before the gig: david@cornerstage.hu

SOUND

Mixer: **Mackie DL32R** (32 inputs), with our in-house sound engineer.
12 monitor sends: 6 are wired to the stage wedges, the rest are free to use.
The mixer is in the stage-right corner. Every channel is run to the middle behind the drums, and 20 channels are cabled to their places on stage.
Cables on request: XLR–XLR, XLR–jack, jack–jack.
If you bring your own mixer, you give us a left/right (L/R) feed, which we send to the PA through the DL32R. Your mics and instruments go into your own mixer, so bring your own cabling and cables.

MICROPHONES

Full drum miking with AKG microphones: kick, 4 toms, snare.
2× Shure Beta 58, 1× Shure SM58, 4× Shure SM57 and a few other microphones.
5 mic stands.

DRUMS

DrumCraft Series 6: 10-12-14-16-22, snare 14.
Heads: Evans EC2 Clear and Evans EMAD.
Stands: 1 straight and 3 boom cymbal stands, hi-hat stand, snare stand. Bring your cymbals and kick pedal.

LIGHTS

Light desk at the far end of the room: **QLC+** with an **Akai APC mini mk2** MIDI controller.
Programmed: 4 beams, 2 washes, 20 PARs, 2 bars and a smoke machine (allowed).
Base light: 4 PARs at the light desk, facing the stage.
Art-Net DMX controller with 1 free universe: your own lighting tech is welcome.

VIDEO AND POWER

Wanbo X5 Pro projector: the gig is streamed live from a phone onto the wall behind the band, and it is recorded.
No three-phase power; outlets as shown on the stage plot.
